

WebKit PDF - Bug #36239

Wrong page count and missing page-offset param

2012-04-17 17:47 - Jacob Baumgartner

Status: Accepted	Start date: 2012-04-17
Priority: Should have	Due date:
Assignee: Reinhard Führicht	% Done: 0%
Category:	Estimated time: 0.00 hour
Target version:	

Description

Generating a pdf, the page number (footer-right = Page [page]) always starts at 4!

Also tested on shell with (see attached file):

```
./wkhtmltopdf --header-right '[page]' 'http://www.spiegel.de' test.pdf
```

Trying the param page-offset results in "Unknown long argument --page-offset".

Tested on Ubuntu 10.04.4 LTS, TYPO3 4.5.6, wkhtmltopdf 0.10.0 beta2

TYPO Script:

```
plugin.tx_webkitpdf_pi1 {
    scriptParams {
        footer-font-size = 10
        header-font-size = 10
        header-spacing = 5
        header-right < temp.title
        footer-right = Seite [page] von [toPage]
        print-media-type =
    }
}
```

```
PDF = PAGE
PDF.typeNum = 124
PDF.config {
    disableAllHeaderCode = 1
    disableCharsetHeader = 1
    disablePrefixComment = 1
    tx_realurl_enable = 0
}
PDF.10 < plugin.tx_webkitpdf_pi1
PDF.10 {
    urls {
        typolink.parameter.data = TSFE:id
        typolink.returnLast = url
        typolink.additionalParams = &template=pdf
        dataWrap = {getIndpEnv:TYPO3_REQUEST_HOST}/|
    }
    staticFileName.data = page:title
    staticFileName.wrap = |.pdf
}
```

Am I the only one with wrong pagination? Maybe I've got wrong settings!

Thanks for the great implementation, regards Jacob

Hi Jacob,

if the error occurs on shell too, it is most certainly a problem in the binary.
I searched the bug tracker and found this:

<http://code.google.com/p/wkhtmltopdf/issues/detail?id=280>

Until I found time to update the binary shipped with the extension, you can download the current version of wkhtmltopdf and use the TypoScript setting "customScriptPath" to use it.

#2 - 2012-04-18 15:09 - Jacob Baumgartner

Hi Reinhard,

thanks for the fast response. With the 0.11.0 rc1 binary from <http://code.google.com/p/wkhtmltopdf/downloads/list> it works as expected.

Thanks, regards Jacob
