#### Description

The Search String feature in the List view is only working for page related items. Items from own extensions, or e.g. TemplaVoila are not found. That feature was working as far as I recall in previous versions (but its broken a few major releases now). Tested for example with 4.6 stable and 4.7 RC

#### History

##### #1 - 2012-04-23 11:46 - Markus Klein

Hi Klaus,

it's not a bug, it's a feature.

See [http://wiki.typo3.org/TYPO3\\_4.6.0#Live\\_Search](http://wiki.typo3.org/TYPO3_4.6.0#Live_Search)

TCA of extensions has to be updated accordingly.

##### #2 - 2012-05-05 12:39 - Klaus Hinum

Hi Markus,

thanks, you are right, somehow missed that change in 4.6.

added

'searchFields' => 'field1,field2,field3' to the ext\_tables.php TCA 'ctrl' section, now it works.

E.g. for all that stumble across that

```
$TCA["tablename"] = array (  
    "ctrl" => array (  
        'searchFields' => 'field1,field2,field3',  
    )  
);
```
