

TYPO3.Fluid - Bug #3651

Call to a member function getBackend() on a non-object

2009-06-12 20:37 - Bastian Waidelich

Status:	Resolved	Start date:	2009-06-12
Priority:	Should have	Due date:	
Assignee:	Bastian Waidelich	% Done:	100%
Category:		Estimated time:	0.00 hour
Target version:			
Has patch:			
Description			
When setting an object as value in View Helpers extending Tx_Fluid_ViewHelpers_Form_AbstractFormViewHelper, a fatal error is thrown.			
<pre><f:form.textbox value="{someObject}" /></pre>			
<pre>-></pre>			
Fatal error: Call to a member function getBackend() on a non-object in [TYPO3ROOT]\typo3conf\ext\fluid\Classes\ViewHelpers\Form\AbstractFormViewHelper.php on line 84			
Reason:			
Some left overs from the Fluid backport:			
<pre>if (is_object(\$this->arguments['value']) && NULL !== \$this->persistenceManager->getBackend()->getUIDByObject(\$this->arguments['value'])) { \$name .= '[_identity]'; }</pre>			
This should rather be something like:			
<pre>if (is_object(\$this->arguments['value']) && is_callable(array(\$this->arguments['value'], 'getUid'))) { \$name .= '[uid]'; }</pre>			
as in renderHiddenIdentityField() of the FormViewHelper.
