Description

Hello,

I know...maybe it's a little bit too early for this :-)

Each extension which has its own Icon in the list of available contentelements (wizicon) have to be updated. Else you got following error:

Fatal error: Call to undefined method t3lib_div::readLLXMLfile() in
[myPath]\typo3_60\typo3conf\ext\formhandler\Resources\PHP\class.tx_formhandler_wizicon.php on line 63

Stefan
