

TYPO3.Eel - Feature #38379

Implement a Eel-ViewHelper

2012-06-25 19:06 - Tobias Liebig

Status: New	Start date: 2012-06-25
Priority: Should have	Due date:
Assignee:	% Done: 0%
Category:	Estimated time: 0.00 hour
Target version:	
Description To make Eel available in Fluid-Templates, Eel (or Fluid) should provide an simple ViewHelper. It should accept an eel expression argument (string, might already be parsed/rendered by fluid), passes that to Eel and return the result. The Fluid TemplateVariableContainer should be passed as the Eel "Context" to access the Fluid variable values within Eel.
