[TASK] Add prefix to code cache identifier

Currently all identifier for php code caches are only a sha1 hash,
so it is not possible to distinguish them in the filesystem.

Add some speaking prefix to the identifier.

[BUGFIX] Fix unit tests for changed identifier

Because of the identifiers being changed in the last
commit, the unit tests failed.

Adjust the tests according to the change.

Revision 4d2538de - 2012-07-01 15:32 - Helmut Hummel

[TASK] Build more PHP modules in travis environment

In order to execute certain unit tests special requirements
of the environment must be met. In particular several
additional PHP modules need to be installed.

Instead of hiding what is added to the environment,
use a helper script to not clutter the travis
configuration file, but at the same time make it

transparent there which PHP modules are built.
