TYPO3 Core - Bug #39026
Quicktime movies abusively prefixed
2012-07-17 14:54 - Francois Suter

Status: Closed
Priority: Must have

Target version: 4.5.18
TYPO3 Version: 4.7
PHP Version: 5.3
% Done: 100%

Description
In the MEDIA CE, Quicktime movies get prepended with a prefix (either the base URL or the absRefPrefix) even if their URL uses a full scheme.

The solution is to introduce a test, similar to the one already existing for the SWF object, that checks before prepending.

[BUGFIX] QT movies prefixed abusively in Media CE

If some prefixes are defined (either base URL or absRefPrefix), the Media CE will apply such prefix to any Quicktime movie even if said movie is referenced by an absolute URL.

History

#1 - 2012-07-17 15:36 - Francois Suter
How to reproduce:

- create a new Media CE and reference a Quicktime video with an external URL
- display the page: nothing gets shown
- look at the source code: both the "src" attribute of the "embed" object and the "new QTObject" statement in the JS point to a URL starting with "http://...".
