Description

psoudo code:

```
$lines = 'array(' . LF;
        $level ++;

// determine if keys are int from 0 to n, without gaps, then $isIntKey = TRUE

foreach ($array as $key => $value) {
                // if isIntKey
            $lines = '';
            else $lines .= str_repeat(TAB, $level) . '\'' . $key . '\' => ';
```

Revision 04857a5d - 2012-07-29 18:47 - Christian Kuhn

[FEATURE] arrayExport() should recognize int keys

t3lib_utility_Array::arrayExport() currently exports array keys always
as strings. With the patch integer array keys are now recognized and
written as integers. Additionally, if all array keys are integers and
consecutive from zero to n, the key is left out completly. See the
unit tests for details.

This is useful for the extListArray in LocalConfiguration, which now
misses the array key and makes the array even more easy to handle.
