Target version:			
Description			
<p>Since TYPO3 4.7 the forceCharset configuration is deprecated. The class Tx_Fluid_Core_Compiler_AbstractCompiledTemplate still uses the value of the localconf.php (\$GLOBALS['TYPO3_CONF_VARS']['BE']['forceCharset']). This patch removes this handling and always set UTF-8 if no default charset is set.</p>			
<p>Related to Extbase fluid issue: #37929</p>
