#### Description

When i change the column of an element within a draft workspace, the content element doesn't get displayed in the new assigned column (backend and frontend). Publishing of the change works though. Tested in TYPO3 4.5.17 and 4.7.3.

I guess that's a duplicate of [#39967](#). Can someone close it, please? (I can't.)

##### #2 - 2012-11-08 15:39 - Falk Kühnel

I dont think its necessary the same, but it could be.

This seems to happen only on "70 - NEW LOCATION (PLH) WSID#1" items. they do not seem to get the column position info appended somehow. In all other requests it is something like "70 - NEW LOCATION (PLH) WSID#1x3" for colPos 3.

- *Is Regression set to No*

Hi,

does the problem still exists within newer versions of TYPO3 CMS (6.2.9)?

**#17 - 2015-01-23 11:33 - Mathias Schreiber**

- *Target version set to 7.5*

**#18 - 2015-06-16 08:54 - Alexander Opitz**

What's the state of this issue?

**#19 - 2015-09-15 11:07 - Riccardo De Contardi**

- *Status changed from Needs Feedback to Closed*

I performed a test in both 6.2.15 and 7.5-dev (latest master) and was not able to reproduce it.

I tested both this scenarios:

- 1) create the element in LIVE workspace > switch to draft workspace > use drag and drop to move it to another column > save  
1.1) page preview > the element is in the correct column
- 2) create the element in CUSTOM (DRAFT) workspace > save it > open it again > change the colpos using the dropdown > save  
2.1) page preview > the element is in the correct column

I close this ticket; if you think that this is the wrong decision or experience this issue again or if you think I should perform a different test, then please write to the mailing list [typo3.teams.bugs](mailto:typo3.teams.bugs) with issue number and an explanation or open a new ticket and add a relation to this ticket number.
