<b>Description</b>			
In Templavoila it's easy to create a reference to a content element: the editor must click the "Create reference" button in the content element.			
Page Module should have the same easiness. Maybe a "Paste reference after" near the "Paste after" menu item.			
P.S.: Please, read this well written post about referenced content elements: <a href="http://www.jochen-froehlich.de/en/typo3-best-practice/references.html">http://www.jochen-froehlich.de/en/typo3-best-practice/references.html</a>
