Description

i have a local typo3 trunk and i have used it for a long time. i just pull new changes via git and now i get the following error when calling the backend:

```
#1270853879: TYPO3 Fatal Error: Extension key "t_y_p_o3.c_m_s.lang" is NOT loaded!
```

Backtrace:

```
7 TYPO3\CMS\Core\Extension\ExtensionManager::extRelPath("t_y_p_o3.c_m_s.lang")
6 TYPO3\CMS\Extbase\Utility\ExtensionUtility::registerModule("TYPO3\CMS.lang", "tools", "language"
, "after:extensionmanager", array, array)
5 require("C:\xampp\htdocs\typo3v4core\htdocs\typo3\sysext\lang\ext_tables.php")
4 TYPO3\CMS\Core\Extension\ExtensionManager::loadSingleExtTablesFiles()
3 TYPO3\CMS\Core\Extension\ExtensionManager::loadExtTables(boolean)
2 TYPO3\CMS\Core\Core\Bootstrap::loadExtensionTables(boolean)
1 require("C:\[...]\htdocs\typo3\init.php")
```

i then tried to call the install tool directly which works and go through the upgrade wizard but there i get a crash as well on the first step:

```
Install Outsourced System Extensions
[func]
[about]
[cshmanual]
[feedit]
[opendocs]
```

```
Class tx_em_Connection_ExtDirectServer does not exist
```

Guys, this does not look like a "stable" core that can be deployed...

Did you clean typo3temp/Cache and your browser cache?

#2 - 2012-09-04 16:56 - Simon Schaufelberger

yes sure, multiple times.

if i add "lang" to the extension list, then it works but why did it disappear? i never uninstalled "lang"...

even if i fix that, i still get the "Class tx_em_Connection_ExtDirectServer does not exist " error in the install tool.

I can confirm this issue.

Have a look at \TYPO3\CMS\Install\Updates\AbstractUpdate line 149:

```
$extensionManagerConnection = \TYPO3\CMS\Core\Utility\GeneralUtility::makeInstance('tx_em_Connection_ExtDirectServer', FALSE);
```

This class does not exist (anymore?).

No reference found for tx_em_Connection_ExtDirectServer in AbstractUpdate. AFAICS this is fixed in current master
