

## TYPO3 Core - Feature #40690

Story # 82206 (New): list module enhancements/bugfixes

### List-view: Mass-setting a value

2012-09-07 04:50 - Stefan Neufeind

<b>Status:</b> New	<b>Start date:</b> 2012-09-07

<b>Description</b>	
Situation: List-view, only one specific record-type selected. In front of the column-title there is already an edit-icon to mass-edit all records. That however loads a list of all records with the possibility to change each one separately.	
Proposal: Have an easy way to set one new value for all of them. One way to do it would be to simply use JavaScript on the client and a new icon near the new value for the first record like "copy to all other records". This would then also allow to choose a new value there, copy that to all other records but before saving still modify individual rows again. Please note that this JavaScript-solution would need to take into account the field-type (select, text, ...).

### History

#### #1 - 2015-01-11 17:13 - Mathias Schreiber

- Priority changed from *Should have* to *Could have*
- Target version set to 7.4 (Backend)

#### #2 - 2015-08-05 10:27 - Susanne Moog

- Target version changed from 7.4 (Backend) to 7.5

#### #3 - 2015-09-24 08:31 - Benni Mack

- Target version changed from 7.5 to 8 LTS

#### #4 - 2017-02-23 14:49 - Riccardo De Contardi

- Target version changed from 8 LTS to 9.0

#### #5 - 2017-08-25 12:27 - Riccardo De Contardi

- Parent task set to #82206

#### #6 - 2018-01-28 14:29 - Susanne Moog

- Target version deleted (9.0)

#### #7 - 2020-03-26 23:50 - Riccardo De Contardi

- Related to Feature #26139: un-/hide multiple records with one click added
