

TYPO3.Flow - Task #4088

Check maximum allowed path length only when creating of cache files failed

2009-07-31 15:38 - Bastian Waidelich

Status:	Closed	Start date:	2009-07-31
Priority:	Could have	Due date:

Category:	Cache	Estimated time:	0.00 hour
Target version:		Has patch:	
Sprint:		Complexity:	
PHP Version:			
Description			
Currently we're checking the length of each cache file that is generated in the caching FileBackend. It might be possible to do that check only if touch() returned FALSE to avoid the (small) performance loss due to the many strlen() calls. This has to be tested and profiled.

There seems to be no way to catch the Warning that PHP's touch() command evokes if the file could not be created.. So this is not easily fixable.
