##### Revision 538a04a8 - 2012-09-22 23:33 - Markus Klein

[TASK] Introduce base class for PHPUnit tests

Previously all core unit tests extended from the Tx\_PhpUnit\_TestCase. This turned out to be problematic because the core tests relied on the behaviour of that class and we could not easily change behaviour centrally for the core tests.

Because of that, we introduced several own base test classes which added functionality for specific test cases.

With introducing a new base test case class which is extended by all core test, we can consolidate helper functions and specific wanted behaviour like blacklisting TYPO3\_DB globals for all tests.

Additionally all tests will benefit from future enhancements in the base class.
