

## TYPO3 Core - Bug #41327

### jsInline removes closing brackets

2012-09-24 20:49 - Simon Schaufelberger

#### Description

this code does NOT work;

```
jsInline {
  10 = TEXT
  10.value (
    jquery(document).ready(function($) {
      $('.pagination li').hover(
        function() {$(this).not('.current').find('em').stop().animate({left: "0px"}, 300)},
        function() {$(this).not('.current').find('em').stop().animate({left: "-270px"}, 300)}
      );
    });
  )
}
```

but this one does (notice the last line):

```
jsInline {
  10 = TEXT
  10.value (
    jquery(document).ready(function($) {
      $('.pagination li').hover(
        function() {$(this).not('.current').find('em').stop().animate({left: "0px"}, 300)},
        function() {$(this).not('.current').find('em').stop().animate({left: "-270px"}, 300)});});
  )
}
```

i guess TYPO3 somehow interprets the last closing brackets as the closing bracket for the 10.value which is really strange.

#### History

#1 - 2012-09-24 23:09 - Stefan Galinski

- Status changed from New to Accepted

Just reproduced this example with the current master. Also if this can maybe fixed, I don't think that the parser can ever work perfectly for such constructs if there isn't something like a CDATA section in XML for such kind of inline code to indicate the parser to not parse the inner content for syntax elements except the ending marker.

#2 - 2015-01-11 17:08 - Mathias Schreiber

- Target version set to 7.2 (Frontend)
- Complexity set to nightmare
- Is Regression set to No

### #3 - 2015-05-18 12:46 - Riccardo De Contardi

- Status changed from Accepted to Needs Feedback
- Assignee set to Simon Schaufelberger

Hi Simon, I am looking at your initial javascript code, and I think there is an error: shouldn't it be:

```
jquery(document).ready(function($) {  
    $('.pagination li').hover(  
        function(){$(this).not('.current').find('em').stop().animate({left: "0px"}, 300)},  
        function(){$(this).not('.current').find('em').stop().animate({left: "-270px"}, 300)} /*<< here a "}" s  
eems necessary */  
    );  
});
```

? The second code has the same problem, I think.

### #4 - 2015-05-18 12:59 - Riccardo De Contardi

- Status changed from Needs Feedback to Accepted
- Assignee changed from Simon Schaufelberger to Benni Mack
- TYPO3 Version changed from 4.7 to 6.2

The bug is still present in 6.2.12 and seems independent from the lack of the "}" I noticed.

### #5 - 2015-05-18 13:01 - Gerrit Code Review

- Status changed from Accepted to Under Review

Patch set 1 for branch **master** of project **Packages/TYPO3.CMS** has been pushed to the review server.  
It is available at <http://review.typo3.org/39596>

### #6 - 2015-06-15 17:44 - Benni Mack

- Target version changed from 7.2 (Frontend) to 7.4 (Backend)

### #7 - 2015-07-17 15:12 - Benni Mack

- Status changed from Under Review to Accepted
- Target version changed from 7.4 (Backend) to 7 LTS

### #8 - 2015-10-08 17:44 - Benni Mack

- Target version deleted (7 LTS)
