Description

This is a bug that was probably introduced or noticed after change lae8a2a8a39d47d7e99743d78188dccdd4238ccfb.

This causes a problem in ExtDirect subrequests that generate URLs to Controllers not inside a subpackage because the subpackageKey from the current request will always be used (e.g. Service\ExtDirect\V1).

Associated revisions

Revision 8ebb3f6e - 2012-10-17 16:52 - Christopher Hlubek

[BUGFIX] Respect explicit empty subpackage in uriFor with subrequests

This change just checks for the empty string in the routing arguments and sets a controller argument for building the URL. That way no subpackage argument will be overridden from the subrequest.
