#### Description

After installation of the extension 'kickstarter' it is not possible to start it. There is no menu to open it and create a new extension. I miss also the feature to edit existing extensions with the kickstarter.

#### History

Extension manager won't be used to open kickstarter anymore. Please see #44223 for a currently running review. Extension builder already has a separate menu-icon in the main menu - and imho that's also the way to go for kickstarter.
