Description

When using the "foreign_selector" feature in an IRRE field with a "select" field on the child side, it creates always a new record when selecting an existing in the select field.

Revision 692bd22c - 2014-01-09 15:18 - Kai Vogel

[BUGFIX] IRRE creates new records when using foreign_selector

This patch links existing child records correctly to the parent IRRE
field when selecting it in the generated dropdown.

Scenario:

Parent table configuration: ===
[...]['columns']['irreField']['config'] = array(
'type' => 'inline',
'foreign_table' => 'childTable',
'foreign_selector' => 'childSelector',
);

Child table configuration: ===
[...]['columns'][childSelector]['config'] = array(
'type' => 'select',
'foreign_table' => 'childTable',
);

What happens? ===
1. The parent IRRE field renders a dropdown field
before the child records
2. Selecting one of the items in the dropdown should
link this child record to current IRRE field
3. Without patch, it will only create a blank child
record
4. Using the patch, it will link the existing child
to the parent IRRE field

Resolves: #43239

Revision b3a82c72 - 2014-01-09 18:34 - Markus Klein

Revert "[BUGFIX] IRRE creates new records when using foreign_selector"

This reverts commit 692bd22c0875fd37e876c79cb4a1738c67873c11

The patch breaks IRRE. It is impossible to add images.

History

#1 - 2012-11-23 00:43 - Kai Vogel

Scenario:

Parent table configuration:

```
[...]['columns']['irreField']['config'] = array(
  'type' => 'inline',
  'foreign_table' => 'childTable',
  'foreign_selector' => 'childSelector',
);
```

Child table configuration:

```
[...]['columns'][childSelector]['config'] = array(
  'type' => 'select',
  'foreign_table' => 'childTable',
);
```

What happens?

The parent IRRE field renders a dropdown field before the child records. Selecting one of the items in the dropdown should link this child record to current IRRE field, but it creates only a blank child record
