Description

On PHP < 5.3 I get this warning on top of the login screen (and also in the whole backend, making it completely unusable):

Strict standards: Declaration of TYPO3\CMS\Core\Compatibility\CompatibilityClassLoaderPhpBelow50307::requireClassFileOnce() should be compatible with that of TYPO3\CMS\Core\Core\ClassLoader::requireClassFileOnce() in /.../typo3_src/typo3/sysext/core/Classes/Core/SystemEnvironmentBuilder.php on line 239

According to git bisect this got broken with change [#43285](#).

Indeed the declaration of the methods differ:

```
class ClassLoader {
...
    static protected function requireClassFileOnce($classPath) {
...
}

class CompatibilityClassLoaderPhpBelow50307 extends \TYPO3\CMS\Core\Core\ClassLoader {
...
    static public function requireClassFileOnce($classPath, $className) {
...
}
```

And by the way, the classname CompatibilityClassLoaderPhpBelow50307 is misspelled (misses an "i" in Compat*i*bility).

[BUGFIX] PHP strict warning in class loader

The compatibility class loader overwrites method requireClassFileOnce and adds a parameter. This triggers a PHP strict warning.
