Target version:	2.0 beta 1	Complexity:	
PHP Version:	5.4		
Has patch:	No		

Description

- introduce touch() method for updating last activity timestamp of remote sessions
- put information about account(s) related to a session so that information can be retrieved without actually unserializing the object graph (resuming the session)

[FEATURE] Touch remote sessions and tag with account info

This introduces two new features: updating the last activity timestamp of a remote session through a new method "touch()" and tagging sessions with their respective account (if any).

Resolves: #43491

Releases: 1.2
