

## kickstarter - Bug #44223

### Add alternative way to open kickstarter (for TYPO3 6.0+)

#### Description

In 6.0+ the dropdown in the extension-manager to open Kickstarter is gone. And since localisation-handling etc. is moved to a separate module now, it looks like that dropdown won't be added again. So maybe kickstarter should also get it's separate menu-entry in the Admin-section of the main navigation on the left.

Initial, rough (!) version of getting modfunc1 running in TYPO3 6.0. Hope it helps to move this further.

It seems, that this patch is working for 6.0.0

Thanks.

Mh, I've applied the patch but nothing appeared :/

/edit

nevermind, after deactivating and reactivating it worked, thought logging out and back in would suffice :)

Hey guys, any news on this issue? Would be great to get the basics working in 6.0+ again.

creation of a new extension does not work for me; the error logged is:

```
PHP Fatal error: Call to undefined method stdClass::importAsType() in
/var/lib/typo3-sites/dummy-6.0.4/typo3conf/ext/kickstarter/class.tx_kickstarter_wizard.php on line 468, referer:
http://typo3.test.6/typo3/mod.php?M=tools\_txkickstarter
```

I use TYPO3 6.0.4

Thanks

I get the same error. I'm also on 6.0.4.
