#### Description

If an admin creates an CE "Images" or "Text w/ images", than the images are not visible for an non-admin user, even if he has the correct rights to edit these elements.

But the non-admin user can add new images without problem, he only can not see images added by the admin.

I have added a screenshot.

Hello Wolfgang,

did you give backend groups the rights of following tables?

- File Storage (sys\_file\_storage)
- File (sys\_file)
- File Reference (sys\_file\_reference)

Stefan

- % Done changed from 0 to 100

Thx, this solved the problem ;)

Issue can be closed.

##### #3 - 2013-02-01 21:12 - Jigal van Hemert

- Status changed from New to Closed

Closed per request of reporter.

##### #4 - 2013-02-14 12:01 - Tobias H.

Hi,

i have almost the same problem. The editor can not see images in "old" CE elements created before the upgrade from 4.5.x. If a admin creates a new Image element, the editor can see them. So the group rights are ok, but maybe not the same rights for the migrated content.

I think it has something to do with the upgrade. Can someone check this and maybe reopen the bug?

##### #5 - 2013-02-15 10:02 - Christian Bernet

We have the same problem.

i think we should open a new Issue, because this Issue is not the same bug.

##### #6 - 2013-02-20 14:00 - Christian Bernet

- File set-pids.php added

There is a open issue (<http://forge.typo3.org/issues/44752>) already for this.  
I have wrote a little script to generate the ids (is attached).
