Description

Hi there

Within my ms word document i have a list which, when copying to typo3, gets malformed with strange </tags>. When i copy it into an rte from TYPO3 4.5.16 it works.

Text within another RTE:

```
<li class=MsoNormal style="MARGIN: 0cm 0cm 10pt; LINE-HEIGHT: 15pt; mso-margin-top-alt: auto; mso-margin-bottom-alt: auto; mso-list: 10 level1 lfo1; tab-stops: list 36.0pt"><span style="mso-bookmark: _GoBack"><span lang=DE style="FONT-SIZE: 12pt; FONT-FAMILY: 'Times New Roman', 'serif'; mso-far-east-font-family: 'Times New Roman'; mso-ansi-language: DE; mso-fareast-language: DE">Test<o:p></o:p></span></span></li></ul>
```

Again another RTE:

```
<LI class=MsoNormal style="MARGIN: 0cm 0cm 10pt; LINE-HEIGHT: 15pt; mso-margin-top-alt: auto; mso-margin-bottom-alt: auto; mso-list: 10 level1 lfo1; tab-stops: list 36.0pt"><SPAN style="mso-bookmark: _GoBack"><SPAN lang=DE style="FONT-SIZE: 12pt; FONT-FAMILY: 'Times New Roman', 'serif'; mso-far-east-font-family: 'Times New Roman'; mso-ansi-language: DE; mso-fareast-language: DE">Test</SPAN></SPAN></LI>
```

RTE 4.7.7 before saving:

```
"><li style="MARGIN: 0cm 0cm 10pt; LINE-HEIGHT: 15pt; mso-margin-top-alt: auto; mso-margin-bottom-alt: auto; mso-list: 10 level1 lfo1; tab-stops: list 36.0pt" class="MsoNormal"><span lang="DE">Test</span></span></span></li>
```

RTE 4.7.7 after saving:

```
"><li style="MARGIN: 0cm 0cm 10pt; LINE-HEIGHT: 15pt; mso-margin-top-alt: auto; mso-margin-bottom-alt: auto; mso-list: 10 level1 lfo1; tab-stops: list 36.0pt" class="MsoNormal">Länge mindestens 6 und maximal 16 Zeichen</span></span></span></span>&lt; //span&gt; </li>
```

Any solutions?
