#### Description

The composer create-project command like described at <http://docs.typo3.org/flow/TYPO3FlowDocumentation/Quickstart/Index.html> doesn't work for me (Mac OS X, zsh). It seems that the --dev option isn't recognized. Maybe it's better to define it by using the longer notation:

#### OLD

```
composer create-project --dev --keep-vcs typo3/flow-base-distribution Quickstart 2.0.0
```

#### NEW

```
composer create-project -s dev --keep-vcs typo3/flow-base-distribution Quickstart 2.0.0
```
