

## forge.typo3.org - Bug #45999

Feature # 36172 (Closed): Forge cleanup and update umbrella issue

### Wrong charset in database?

2013-03-04 09:02 - Steffen Gebert

#### Description

It looks like on the *old* redmine server, the database isn't clean:

<http://forge.typo3.org/issues/43869#note-4> (journals id 144987) contains wrong encoded special characters. This is broken after importing the dump on the new server.

I wasn't able to correct that problem with iconv magic or replacing CHARSET=utf8 with CHARSET=latin1.

Help is needed.

well, we have double utf-8 encoded content in the database unfortunately. This is nothing that is messed during update/import. This is due to fixed/improved charset handling in rails/redmine which uncovers broken environments. I'll add a script to fix it soon.

##### #3 - 2013-03-05 10:00 - Peter Niederlag

another (simple) option should be:

1. mysqldump --default-character-set=latin1
2. in dump only fix one line 'SET NAMES latin1' into 'SET NAMES utf8'
3. import dump
4. run migrations

##### #4 - 2013-03-07 20:59 - Michael Stucki

Is this fixed?

##### #5 - 2013-03-07 21:28 - Steffen Gebert

We have to copy the DB to the new server as described by Peter. We don't have a battle plan for the migration, so let's keep this open until then.

Still an issue? fixed during upgrade?

imho we could just close this one as fixed
