<b>Target version:</b>			
<b>Description</b>			
If we use "Production/Staging" context per ex. we have a subdirectory in the configuration directory, and this directory break the SymlinkConfigurationTask because we use "rm -f Production/*", but should be "rm -Rf Production/*"			
Patch is coming

[BUGFIX] Sub-contexts are not supported

If using e.g. "Production/Staging" as context a subdirectory in the configuration directory exists. This directory is now correctly removed using "rm -Rf Production/\*" instead of "rm -f Production/\*". The SymlinkConfigurationTask thus no longer breaks.

Change-Id: I02427a3b2d91ff2ad260f2779ca0d290a1e2e7cc

Fixes: #46052
