

TYPO3 Core - Bug #46568

Subfolders must use the identifier as identifier and not the name

2013-03-22 19:14 - Georg Ringer

Status:	Closed	Start date:	2013-03-22

Description

Currently subfolders don't use the identifier correctly as the name is used instead. This doesn't really matter if you got a folder structure anyway but dealing with different identifiers leads to troubles.

`createFolderObject()` will create a new Folder object which then has the identifier set wrong.
