Description			
As suggested in the wiki it is helpful to tag caches with a combination of table and record uid to get the cache deleted when the specific record was edited. But rather that each extension provides its own implementation it would be better to store this simple function into the core.

[FEATURE] Provide flushing cache by table and record tags

As suggested in the wiki it is helpful to tag caches with a combination of table and record uid to get the cache deleted when the specific record was edited. But rather that each extension provides its own implementation it would be better to store this simple function into the core.
