Description

The Search Result Description is really short. So I found the bug in the code. In SearchController around Line 580:

```
/**
 * Returns the resume for the search-result.
 *
 * @param array $row Search result row
 * @param boolean $noMarkup If noMarkup is FALSE, then the index_fulltext table is used to select the content of the page, split it with regex to display the search words in the text.
 * @param integer $length String length
 * @return string HTML string
 * @todo overwork this
 */
protected function makeDescription($row, $noMarkup = FALSE, *$length = 180*) {
    if ($row['show_resume']) {
        if (!$noMarkup) {
            $markedSW = '';
            $res = $GLOBALS['TYPO3_DB']->exec_SELECTquery('*', 'index_fulltext', 'phash=' . intval($row['phash']));
            if ($ftdrow = $GLOBALS['TYPO3_DB']->sql_fetch_assoc($res)) {
                // Cut HTTP references after some length
                $content = preg_replace('/(http:\\\\\/\\\/[^\ ]{60}) ([^\ ]+)/i', '$1...', $ftdrow['fulltextdata']);
                $markedSW = $this->markupSWpartsOfString($content);
            }
            $GLOBALS['TYPO3_DB']->sql_free_result($res);
        }
        if (!trim($markedSW)) {
            $outputStr = $GLOBALS['TSFE']->csConvObj->crop('utf-8', $row['item_description'], $length);
            $outputStr = htmlspecialchars($outputStr);
        }
        $output = $outputStr ? $outputStr : $markedSW;
        $output = $GLOBALS['TSFE']->csConv($output, 'utf-8');
    } else {
        $output = '<span class="noResume">' . \TYPO3\CMS\Extbase\Utility\LocalizationUtility::translate('result.noResume', 'indexed_search') . '</span>';
    }
    return $output;
}
```

The variable name should be \$length not \$lgd.

Associated revisions
