Description			
The UUIDs generated by that method were always lowercase, now they are uppercase. As soon as you do a case-sensitive comparison on those UUIDs as strings, this will now break, even if the UUIDs are the same semantically.

[BUGFIX] generateUUID() creates uppercase characters in UUIDs

The UUIDs generated by that method were always lowercase, now they are uppercase (since change I1237fdfbee75cbfca2f2082cf30a69383dbc7fd5). As soon as you do a case-sensitive comparison on those UUIDs as strings, this will now break, even if the UUIDs are the same semantically.

This change makes them lowercase again.
