Description			
The render_upload function got changed in line: <pre>t3lib_div::loadTCA('tt_content'); to \$GLOBALS['TSFE']->includeTCA();</pre> This change does not consider configurations made to other extension TCA configurations inside tca.php. Please revert this change. It effects TYPO3 version 4.5.25 and 6.0.4 (not tested with 6.1.0)

6.1 should not have this problem. This line is taken out there.

#2 - 2013-05-07 13:34 - Michael Christian

- Target version set to 4.5.26

Could you please change the priority to "Must have".

The upload-FE rendering not working with "\$GLOBALS['TSFE']->includeTCA();" - with "t3lib_div::loadTCA('tt_content');" everything is fine (at the FE).

Thank you.

#3 - 2013-07-01 16:16 - Michael Christian

- Assignee set to TYPO3 Release Team

Could you please fix the render upload error with V4.5.28.

#4 - 2015-05-18 11:58 - Benni Mack

- Status changed from New to Closed

- Assignee deleted (TYPO3 Release Team)

- Is Regression set to No

This one seems to be fixed. No problems with all supported versions anymore.
