| Target version: | 2.0.1 | Complexity: | |
| PHP Version: | | | |
| Has patch: | No | | |

Description

ResourceManager::importResource(\$uri) allows the import of resources from a supplied url. The import fails, if an url with get-parameter is supplied, because pathinfo() do not parse this url correctly.

e.g.

works fine: <http://forge.typo3.org/images/headerimages/16.jpg>

import fails: <http://forge.typo3.org/images/headerimages/16.jpg?sampleParameter=sampleValue>
