

MW Imagemap - Bug #48059

not compatible with TYPO3 4.7 on windows

2013-05-08 15:05 - Simon Schaufelberger

Status:	New	Start date:	2013-05-08
Priority:	Must have	Due date:	
Assignee:		% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:		Spent time:	0.00 hour
Description			
the backend module is called with:			
http://localhost/typo3conf/ext/mwimagemap/mod1/index.php?id=C:/xampp/htdocs/fileadmin/templates/images/karte/x%x%			
which results in a path:			
fileadmin/xampp/htdocs/koax24.de/htdocs/fileadmin/templates_diamantlift/images/karte/			
in function mapContent() after:			
<pre>if(preg_match('/\:/',t3lib_div::_GP('id')))</pre>			
which is wrong.			
if i comment out that if block, it works.

Hi Simon,

I will look that up and see if I can reproduce this problem.
If there is a bug it will be fixed once someone pays for fixing it
or someone pays for implementing a new feature .

Thanks and cheers
Michael

Hi,

It seems as if preg_match does not work well with single quotes although it is syntactically correct.

This will be treated in the next version.
