Work Package # 45020 (Closed): Content Editing Stability and Features

Image captions should be edited inline

2013-05-08 22:04 - Aske Ertmann

Status:	Closed	Start date:	2013-05-08
Priority:	Should have	Due date:	
Assignee:		% Done:	100%
Category:	Content Editing	Estimated time:	0.00 hour
Target version:		Spent time:	0.00 hour
Description			
Instead of the approach we have now with having the caption in the inspector, we should instead make a checkbox that is marked with "reloadIfChanged" and then a <caption> tag is rendered that can then be modified. This is would prevent using space in the inspector and make it easier to write what's needed since it can then be formatted like other text. It also makes it easier to solve the issue with having different captions for multiple images (not yet possible).

[TASK] Image captions should be edited inline

Changes the caption UI for Image and TextWithImage node types from input to a checkbox in the inspector and caption can now be edited inline after activating the checkbox and applying in the inspector.

This also adds a new node migration to make existing captions visible.

- Assignee set to Adrian Föder

Hey Adrian what do you think about this change? I know we just merged the other stuff, but I feel like this is how it should have been done instead. Not sure why I never thought of it before.
