I created a first changeset, consider this a prototype for now :)

Main things i did:

1. Fix some path constants to the correct phar uri's
2. use "sys_get_temp_dir()" as target for Logs, Persistent and Resources
3. Disabled is_writable checks for cache and temporary directory

I created a little distribution to test this as well:

<https://github.com/mneuhaus/TYPO3.Flow-Phar-Testing>

(You need Box:<http://box-project.org/> to create the phar and maybe Beard:<https://github.com/mneuhaus/Beard> to pull in the changeset)

Instructions:

```
git clone git@github.com:mneuhaus/TYPO3.Flow-Phar-Testing.git
cd TYPO3.Flow-Phar-Testing.git
composer update
beard patch
./build.sh
```

This will take a few minutes. When it's done you'll have a ready to use phar in your Build directory :)
