Category: ViewHelpers	Estimated time: 0.00 hour
Target version:	
Has patch: No	
Description Adding Data Attributes to tag-based ViewHelpers via "additionalAttributes" is an exhausting task, because of the escaping and nesting stuff and so on. <pre><f:link action="doSomething" data-role-tooltip="{f:translate(id:'doSomething')} ">Do something!</f:link></pre> vs. <pre><f:link action="doSomething" additionalAttributes="{data-role-tooltip: '{f:translate(id:\'doSomething\')}'} ">Do something!</f:link></pre>	
Related issues: Is duplicate of TYPO3.Fluid - Feature #35748: Add generic data-* attribute Resolved 2012-04-06
