#### Description

In install/Resources/Private/Language/Report/locallang.xlf the label "environment.status.message.warning" contains this text:

*The system environment check returned warnings. Those errors might have a negative affect to the functionality and stability of your TYPO3 CMS instance. Please check the install tool "System environment" for all details.*

This text contains two mistakes:

- First it must not be "errors", but "warnings" in this label. (The term "error" is used in the label directly above and means a different category of problem there. Warnings and errors here are not the same.)
- Second it is not "have a negative affect", but "have a negative effect"; with "e".

So the good text reads:

*The system environment check returned warnings. Those warnings might have a negative effect on the functionality and stability of your TYPO3 CMS instance. Please check the install tool "System environment" for all details.*
