Description

The toolbar of the workspace module visualizes each workspace in a separate tab. On having many workspaces, the toolbar is extended to multiple lines which actually reduces the available viewport of the grid panel.

Currently it looks like this:

The screenshot shows the TYPO3 workspace module toolbar. At the top, there is a user profile for 'admin' with a 'Logout' button, followed by navigation icons (star, lightning bolt, printer) and a search input field with the placeholder 'Enter search term'. Below this is a breadcrumb path: 'Path: New TYPO3 site [pid:]'. The main part of the toolbar is a grid of workspace tabs. The first tab is 'LIVE workspace'. The remaining tabs are arranged in a grid that wraps to multiple lines: Workspace #1 to #13 in the first row, #14 to #18 in the second, #19 to #22 in the third, #23 to #4 in the fourth, and #5 to #9 plus an 'All' tab in the fifth. Below the grid are two dropdown menus: 'Infinite' and 'all languages'. At the bottom, there is a dark grey bar with three sections: 'Changed' (with a flag icon), 'Live-Title' (with a dropdown arrow), and 'Modification'.

[TASK] Use alternative selector for many workspaces

The toolbar of the workspace module visualizes each workspace in a separate tab. On having many workspaces, the toolbar is extended to multiple lines which actually reduces the available viewport of the grid panel.

This change introduces a modified TabPanel that shrinks if the available width is undershot. In this case an additional menu is rendered to the right side of the panel to visualize the remaining items in a vertical list.

[BUGFIX] Drop obsolete workspace fluid partial

A last partial usage has been dropped during 6.2 times but the file has never been removed. Do that now to avoid further developer confusion.
