

TYPO3.Fluid - Bug #4972

f:format.date does not respect locale.

2009-10-12 10:04 - Nikolas Hagelstein

Status: Closed	Start date: 2009-10-12

Target version:	
Has patch:	
Description The fluid date helper does not respect the locale date format set by e.g. setlocale. This issue is caused by the fact that the viewhelper makes use of PHP's DateTime object internally which isn't capable of locale time formats. Currently only "strftime" seems to respect locales.

Then use `return strftime($format, $date->getTimestamp());` - but the format string must be different then, sigh.

And why the heck is there no locale-aware date formatting on DateTime? Grr.

Probably because http://devzone.zend.com/article/4799-Internationalization-in-PHP-5.3#Date_formatter is the way to go now...
