<b>Target version:</b>		<b>Complexity:</b>	
<b>PHP Version:</b>			
<b>Has patch:</b>	No		

#### Description

Issue occurred trying to install TYPO3 Neos Alpha4

Installing with the instructions from [neos.typo3.org/download.html](https://neos.typo3.org/download.html), and following this command pattern

```
composer command + doctrine:migrate + site:import + user:create
```

I get the following error

```
[] Neos git:(cd5105e) ./flow user:create --username sorenmalling --password YOURPASSWORD --first-name YOURFIRSTNAME --last-name YOURLASTNAME --roles "TYPO3.Neos:Administrator"
The role with identifier "TYPO3.Neos:Administrator" is unknown
[] Neos git:(cd5105e) ./flow user:create --username sorenmalling --password YOURPASSWORD --first-name YOURFIRSTNAME --last-name YOURLASTNAME
The role with identifier "TYPO3.Neos:Editor" is unknown
```

After chatting with Rens we came to the conclusion that TYPO3.Neos Roles aren't synchronized with the rest of the Flow roles.

#### History

##### #1 - 2013-07-08 10:11 - Rens Admiraal

- Category set to Security

a workaround for this issue is force clearing the cache with

```
./flow flow:cache:flush --force
```

Tested if <https://review.typo3.org/#/c/22061/> is actually present in the local install with given composer command, and it is. So the role synchronization should've been done directly after the doctrine:migrate command.
