

TYPO3 Core - Bug #49904

TCEFORM.tt_content.imageorient.removeItems = --div-- also removes imageorient "0 = Above, center"

2013-07-11 14:48 - Fabian Thommen

Description			
If you want to remove the <code>__no wrap:__</code> (see screenshot) over user config with: <pre><pre>TCEFORM.tt_content.imageorient.removeItems = --div--</pre></pre> Position "0 = Above, center" is also removed. This bug already exists in typo 4.5 !

History

#1 - 2013-07-30 02:26 - Philipp Gampe

- Category changed from Backend User Interface to Backend API
- Status changed from New to Needs Feedback
- TYPO3 Version changed from 6.1 to 6.0
- PHP Version set to 5.2
- Complexity set to hard

Did you try to remove the items 25 and 26? This should also remove the whole optgroup.

I do not think that we will fix this for 4.x, because those are in priority&security maintenance.

#2 - 2013-07-30 17:40 - Fabian Thommen

If I remove 25 and 26, of course `--div--` has gone.

But for this project specific config, I need imageorient 0 and 26

```
TCEFORM.tt_content.imageorient.removeItems = 1, 2, 8,9,10,18, 17, 26
```

Its ok to fix it for 6.x branch.

Maybe this `--div-- = no_wrap` should be removed anyway, it's a bit odd anyway.

#3 - 2014-01-06 11:13 - Alexander Opitz

- Status changed from Needs Feedback to New
- Is Regression set to No

#4 - 2015-02-16 18:31 - Mathias Schreiber

- Status changed from New to In Progress

- Assignee set to Mathias Schreiber

Note to self:

SelectElement:347 -> add (string)

#5 - 2015-11-07 23:09 - Riccardo De Contardi

Is this <https://forge.typo3.org/issues/62133> related?

#6 - 2015-11-12 17:30 - Mathias Schreiber

- Target version deleted (6.2.0)

#7 - 2016-04-22 22:01 - Riccardo De Contardi

Still present in 6.2.x, 7.6 and latest master (8.1-dev); it affects both CSC and FSC

#8 - 2016-08-16 11:24 - taywa gmbh

After some years I revisit this issues (Using my company user 'taywa') I think best would still be remove --div-- at all. As written here: [#50570](#)

Fabian

#9 - 2017-08-10 16:48 - Carsten Arloth

This weird behaviour is still existing in 8.7 LTS (using 8.7.2 as of now).

I want to keep specific values of imageorient, but want to get rid of the optgroups inside the select box.

#10 - 2017-08-10 16:56 - taywa gmbh

- Target version set to 9.0

#11 - 2018-01-28 18:27 - Susanne Moog

- Target version changed from 9.0 to Candidate for patchlevel

#12 - 2018-02-04 10:35 - Mathias Schreiber

- Status changed from In Progress to Closed

fixed in master
