Google Maps API Extbase - Suggestion #50120

Keep settings function out of the global namespace

2013-07-17 16:50 - Mathias Brodala

Status:	Closed		**Start date:**	2013-07-17
Priority:	Should have		**Due date:**

Target version:			**Spent time:**	0.00 hour

Description

The JavaScript function get<map title>Settings() is currently placed directly in the global namespace.

This can be avoided by simply encapsulating it in an anonymous function execution. See patch attached.
