Description

Though this is small, the docs state that

```
<f:form.upload property="attachments.0.originalResource" />
<f:form.upload property="attachments.1.originalResource" />
```

translates to

```
<input type="file" name="formObject[attachments][0][originalResource]">
<input type="file" name="formObject[attachments][0][originalResource]">
```

Obviously, this is not the case. Second index is 1.
