

TYPO3.Flow - Task #50382

Task # 51183 (New): CLI improvements

Impossible to use arguments in CLI that are added by overriding initializeCommandMethodArguments()

2013-07-24 14:47 - Karsten Dambekals

Status:	New	Start date:	2013-07-24
Priority:	Should have	Due date:	
Assignee:		% Done:	0%
Category:	Command	Estimated time:	0.00 hour
Target version:		Has patch:	No
Sprint:		Complexity:	
PHP Version:			

Description

Having something like

```
/**
 * @return void
 * @throws \TYPO3\Flow\Mvc\Exception\InvalidArgumentTypeException
 */
protected function initializeCommandMethodArguments() {
    parent::initializeCommandMethodArguments();
    $this->arguments->addNewArgument('porcelain', 'boolean', FALSE, FALSE);
}
```

should provide the porcelain option to all command methods. But since the CLI request never returns true for hasArgument(), since parseRawCommandLineArguments() uses the ReflectionService and thus will never consider the --porcelain flag if given on the command line.
