#### Description

When reaching bottom or top of the page while dragging a content element the page should scroll to make it possible to drop the content anywhere on the page.

[TASK] Use jQuery UI for Drag&Drop in Page Module

In the process to move away from ExtJS and fixing some open problems, the JS code for the drag+drop functionality in the page module is rewritten based on jQuery UI.

In addition to having a RequireJS module, the new JS-based DataHandler AJAX call is used. Also, a content element is only moved in the HTML code, if the AJAX result is true. Scrolling works as well, which resolves the existing problem from forge ticket #50576.

Resolves: #50576

Resolves: #64221

Releases: master

#### History

##### #1 - 2013-08-25 14:09 - Ernesto Baschny

- Category set to Backend User Interface

- Status changed from New to Accepted

- Priority changed from Must have to Should have

- Complexity set to medium

Indeed would be a nice enhancement to the page module.

##### #2 - 2013-08-28 00:12 - Ernesto Baschny

Jigal is working on that here at the CMS Sprint in Essen. Not so easy as the ExtJS drag&drop is difficult to configure, but he is trying hard. :)

##### #3 - 2013-09-09 12:33 - Jo Hasenau

We already got that for Gridelements 1.x and 2.x so maybe we can do something about it during the Gridelements weekend. Otherwise Jigal might want to take a look at the code and just copy the appropriate parts.

IIRC one of the workarounds for a usable D&D + scrolling was to define a surrounding container as "display:table", since the D&D area was restricted to 100% width and height of the currently visible part, which made it impossible to drop anything outside that area, even though scrolling itself worked fine.

- *Tracker changed from Feature to Bug*

This is indeed not solved yet, I think Jigal has not managed to finish his work on this. It would be great - Joey - if you could provide some patch for fixing this in the core. thanks!

**#5 - 2014-09-09 14:13 - Jo Hasenau**

Will be a task for the user experience week - should be easy to implement.

**#6 - 2014-09-09 14:14 - Jo Hasenau**

On the other hand: It's ACME - so maybe we can even tackle that here in Munich ;-)

**#15 - 2015-04-02 15:34 - Denis Mir**

This bug is still available in the 6.2 LTS which makes it awful to work with.
