<b>Target version:</b>	<b>Complexity:</b>
<b>PHP Version:</b>	
<b>Has patch:</b> No	

#### Description

TYPO3\Flow\Package\Package:

```
....  
$namespaces = $manifest->autoload->{'psr-0'};  
  
if (count($namespaces) === 1) {  
    $namespace = key($namespaces);  
}  
....
```

key() should be called using an array as its parameter, \$namespaces is a stdClass  
<http://www.php.net/key>

I propose casting the result of the autoload method to an array before calling key()
