Revision b5d6e9fc - 2013-10-22 20:14 - Ernesto Baschny

[TASK] Added missing core autoloaded files

Adds lots of missing autoloading files in t3lib/core_autoload.php and cms/ext_autoload.php and fixes some bugs.

These files were autogenerated by extdeveval and thus also change the order of the entries to a natural sorting. Refer to the issue in the tracker for details on what exactly changed.

Resolves: #50881

Releases: 4.7, 4.5

tslib_menu_filterMenuPagesHook does not get autoloaded, too. Happens in 4.7.14.

#2 - 2013-09-04 22:35 - Ernesto Baschny

- Status changed from New to Accepted
- Assignee changed from Jigal van Hemert to Ernesto Baschny
- Priority changed from Should have to Must have
- Target version set to next-patchlevel
- TYPO3 Version changed from 4.7 to 4.5

In 4.5 there are also several missing autoload entries in `core_autoload.php`. If we are aiming for the smooth migration and we recommend people to remove their `require_once` we need to make sure that this really works for the **whole** core.

I will regenerate the `core_autoload.php` with `extdevel` and also include `typo3/*`.php files in it (because they too could be autoloaded, like the "template" or "bigDoc" classes) in 4.5 and 4.7.

#3 - 2013-09-04 22:36 - Ernesto Baschny

- Subject changed from `interface backend_cacheActionsHook` not autoloaded to `Fix 4.5/4.7 missing autoloaded classes (i.e. backend_cacheActionsHook)`

If you review the above patch, here is a summary of what has exactly changed (despite the reordering of the class names):

4.5 removed in `sysext/cms/ext_autoload.php` (because they were buggy):

- `'t3lib_tmenu_layers'` => `PATH_t3lib . 'media/scripts/tmenu_layers.php'`,
- `'t3lib_gmenu_layers'` => `PATH_t3lib . 'media/scripts/gmenu_layers.php'`,

4.5 corrected in `sysext/cms/ext_autoload.php`:

- + `'t3lib_menu_filtermenupageshook'` => `PATH_t3lib . 'interfaces/interface.t3lib_menu_filterMenuPagesHook.php'`,

4.5 added in `t3lib/core_autoload.php`:

The 4.7 branch was much cleaner already, probably someone did run the cleanup script before the release. :)

But still, some changes (including the tslib_menu_filtermenupageshook fix mentioned by Christian):

4.7 removed in sysext/cms/ext_autoload.php (because they were buggy):

- 'tslib_gmenu_layers' => PATH_tslib . 'media/scripts/gmenu_layers.php',
- 'tslib_tmenu_layers' => PATH_tslib . 'media/scripts/tmenu_layers.php',
- 'tx cms_backendlayout' => PATH_tslib . 'classes/class.tx cms_backendlayout.php',

4.7 added in sysext/cms/ext_autoload.php:

- + 'tx cms_fehooks' => PATH_tslib . 'hooks/class.tx cms_fehooks.php',

4.7 corrected in sysext/cms/ext_autoload.php:

- 'tslib_menu_filterMenuPagesHook' => PATH_tslib . 'interfaces/interface.tslib_menu_filterMenuPagesHook.php',
- + 'tslib_menu_filtermenupageshook' => PATH_tslib . 'interfaces/interface.tslib_menu_filterMenuPagesHook.php',

4.7 added in t3lib/core_autoload.php:

the whole typo3/* .php classes

4.7 removed in t3lib/core_autoload.php:

- 't3lib_signalslot_invalidslotexception' => PATH_t3lib . 'signalslot/InvalidSlotException.php',

- *Is Regression set to No*

Just noticed that I missed some subdirectories of typo3/, most importantly the typo3/interfaces, which contain exactly the claimed backend_cacheActionsHook. Will expand the list further next week. You can already review this state, if you want and then just the diff to the next round afterwards. Thanks! :)
