<b>Description</b>			
Hi,			
I use TYPO3 6.1.3 and when I try to open phpmyadmin, I got this error :			
Fatal error: Allowed memory size of 134217728 bytes exhausted (tried to allocate 71 bytes) in .../typo3conf/ext/phpmyadmin/res/phpMyAdmin-3.5.8.2-all-languages/libraries/auth/signon.auth.lib.php on line 151			
The PHP memory_limit is set to 128M. Is there any possibility to avoid this error?			
Thanks

### History

#### #1 - 2013-08-20 09:43 - Lukas Taferner

Same here, downgrading to 4.15.1 solved the problem!

Please fix this issue. Downgrading to an old unsecure version can't be the solution.

Extension Version 4.17, TYPO3 4.5.32, PHP 5.3.3-7+squeeze17

```
PHP Fatal error: Allowed memory size of 134217728 bytes exhausted (tried to allocate 4504527 bytes) in ../typo3conf/ext/phpmyadmin/res/phpMyAdmin-3.5.8.2-all-languages/libraries/Error.class.php on line 160
```

#### #4 - 2014-01-16 14:31 - Stefan Neufeind

Would be great if you could try to help dig into the details so somebody can create a fix.

#### #5 - 2014-01-21 16:45 - Maik Nergert

I spent some time on the diff's from 4.15.1 to 4.16 and found out, that using the old

```
/res/phpMyAdmin-3.5.4-all-languages/libraries/Error_Handler.class.php
```

from Version 4.15.1 works for me in 4.16 and 4.17

Can somebody confirm that the Error\_Handler.class.php is part of the issue?

**#6 - 2014-01-22 08:34 - Eric Chavillaz**

I try with the "old" error handler and I can confirm that it works!

I use TYPO3 6.1.7 with PHP 5.3.

Thanks

*- Status changed from Under Review to Resolved*

Latest version 4.18.0 (phpMyAdmin 4.0.10) has been committed to Forge/SVN and pushed to TER and compatibility had been tested with TYPO3 4.5 and 6.1.x.
