

## TYPO3.Fluid - Feature #51100

### Links with absolute URI should have the option of URI Scheme

2013-08-16 11:14 - Patrick Kroog

<b>Target version:</b>			
<b>Has patch:</b>	No		

**Description**

At the moment it's not possible to build absolute URIs with https scheme.

Only the ExternalViewHelper allows configuring the URI scheme.

Describing example of the problem:

```
<f:uri.action pageUid="1" arguments="{client:client}" absolute="1" />
```

builds a full link like:  
- [http://example.com/index.php?id=1&tx\\_myplugin\[client\]=10](http://example.com/index.php?id=1&tx_myplugin[client]=10)

But there's no option to set the URI scheme to https, although the uriBuilder would allow setting the URI scheme:  
`$uriBuilder->setAbsoluteUriScheme("https");`

(Referring to: fluid/Classes/ViewHelpers/Uri/ActionViewHelper.php)

--

So there should be another option for this in the render method in the Action/Page Viewhelpers!

#### History

##### #1 - 2013-08-16 12:04 - Patrick Kroog

- File *ActionViewHelper.patch* added
- File *PageViewHelper.patch* added

These are patches for TYPO3 v4.7.14 on the [Uri ViewHelpers](#)

- PageViewHelper
- ActionViewHelper

Both must be used, otherwise the uribuilder doesn't UNSET the uri scheme value before the next link is generated..

##### #2 - 2013-08-16 12:06 - Patrick Kroog

- File *ActionViewHelper.patch* added
- File *PageViewHelper.patch* added

These are the patches for the [Link ViewHelpers](#) (TYPO3 v. 4.7.14)
